

OUR PRODUCTS

WIRELESS MOTOR CONTROLLER

Parameters	Technical Specification
Wireless Range	Up to 200 mts.
Motor type	Single and three phase
Motor selection Channels	Up to 6 Channels
Motor operations	Start/Stop, Forward/Reverse

Considering the practical situations in manufacturing plants often it necessitates the requirement to operate and monitor the machines at same time, since this is not possible with panel mounted motor switches. Mechanic labs has developed a hand held wireless motor controller which operates the motor from any place within range.

APPLICATIONS

- Dragger trolley in AAC plants.
- Conveyor lines.

Note – Control unit specifications can be changed according to customer's requirements.

ADVANTAGES

- Wireless operation.
- No risk of wire cut or short circuit.
- Multi station control from single remote.
